

Illustrator Assessment #1

- Create a new letter sized document in Illustrator
- Create an ellipse
- Create a rectangle or a square
- Create a polygon
- Align along the left side of your page
- Add different color to fill each object
- Apply a different color stroke to each object
- Scale the polygon to make it smaller than the original
- Rotate the square/rectangle 10 degrees
- Group all three shapes
- Reflect horizontally the group and copy the shapes (use the reflect tool)
- Drag the new copied shapes next to the original shapes
- Draw a large star and position it over all the shapes. Make the star small enough so that some of the shape peak out from behind the star.
- Fill the star with a color
- Copy the star (Edit> copy or CTRL C) (DO NOT PASTE)
- Select all objects on your art board
- Create a clipping mask of the selected objects (Right Click on Star, then click clipping mask)
- Paste the copied star in back (Edit> Paste in back)
- Group all objects
- Move to center

Finished product should look similar to star at right.
