

Sail Boat Animation Rubric

Points possible	Points earned	task
5		Animation lasts for 100 frames at 24 fps
10		Sun rises and sets using a motion tween.
10		Sun and sky change color over time. Clouds float across the scene.
10		Boat enters the scene and stops in the middle of the scene.
15		The boat rocks slightly back and forth. (Use extra keyframes within the tween and set the rotation of the boat forward or back.) *Use the Free Transform tool to set the rotations.
15		Create an animation within the boat symbol (a flag waving or sail moving or a pirate or ???) Be creative!
15		Create an animation within the fish symbol. Examples are fins undulating, bubbles floating, eyes blinking.
20		At least 3 fish swim on a path on the main timeline. Fish swim and jump and are different sizes and move from different directions. Each animated fish lives on its own layer.
